

CRM Small/Mid Cap Select

September 30, 2025

Product Overview

- CRM Small/Mid Cap Select is a unique, concentrated, high-active share strategy with approximately 20 names with market caps between \$250 million to \$20 billion which are impacted by change or undergoing transformation.

Why Invest in CRM

- Specialist.** We have been investing in the small/mid cap value space with the same time-tested philosophy and process since 1973.
- Alignment.** Our current generation of employees bought 100% of the company in 2019, signaling our long-term commitment to the Firm and our clients. This alignment allows for retention of key talent.
- Eclectic.** Our history, connections, and process lead us to find companies that are underfollowed or misunderstood by other investors.
- Access.** The experience and reputation of our company, and our research team allows for constructive interaction with company management. We have been able to identify and affect positive change with our portfolio holdings.
- ESG.** We effectively integrate ESG analysis into our investment process. Also, we consistently engage with our portfolio holdings on material ESG matters.

Concentrated Portfolio Advantages

- Expanded, unconstrained opportunity set gives managers more flexibility
- Greater concentration can lead to greater alpha opportunity
- Fewer stocks allows for a greater focus: simplicity is better
- Size and style factor out of favor since early 2011: timing is potentially very good for outsized returns in the coming 3-5 years
- Top ten shareholder which gives us both access and influence

Market Capitalization

Important Disclosures

Past performance is not a guarantee of future results. Valuations and returns are computed and stated in U.S. Dollars, are dollar-weighted and reflect the reinvestment of dividends and other earnings. Performance is calculated monthly, and the gross performance results for the portfolio are presented before management fees but after all trading commissions. The net performance results are presented after deducting a management fee. The performance information includes a comparison to various benchmarks, which are rebalanced annually. A list of all firm composites, including annual returns, fees, size and number of accounts, is available upon request. Investing involves a risk of loss. A concentrated strategy may lead to larger losses than a more diversified strategy.

This Fact Sheet does not constitute an offer to buy or sell securities. Please contact CRM for more information at 212-326-5300.

EV/EBITDA ("Enterprise Multiple") is a measure used to determine the value of a company and takes enterprise value (EV) (market capitalization plus total debt minus cash and cash equivalents) divided by earnings before interest, taxes, depreciation, and amortization (EBITDA). In determining the value of a company, the ratio is used to consider the company's debt and cash levels in addition to its stock price and relates that value to the company's cash profitability. Metrics are shown as a weighted average. Estimates exclude the Financials, Real Estate, and Utilities sectors for both the Strategy and Benchmark. Internal estimates are proprietary to CRM. Broker and Index estimates are sourced from LSEG Workspace.

Net Debt/EBITDA is a measure used to determine leverage and takes total debt minus cash and equivalents divided by EBITDA. The ratio is used to show how many years it would take for a company to pay back debt if net debt and EBITDA are held constant. In circumstances where a company has more cash than debt, the ratio can be negative. Metrics are shown as a weighted average. Estimates exclude the Financials, Real Estate, and Utilities sectors for both the Strategy and Benchmark. Internal estimates are proprietary to CRM. Broker and Index estimates are sourced from LSEG Workspace.

Wtd Avg Mkt Cap (Weighted Average Market Cap) is weighted by the market capitalization of each tick in the index.

Wtd Median Mkt Cap (Median Market Cap) is the weighted market capitalization midpoint in the index.

Cramer Rosenthal McGlynn, LLC licenses and applies the SASB Materiality Map[®] General Issue Categories in our work. SASB's Materiality Map[®] identifies sustainability issues that are likely to affect the financial condition or operating performance of companies within an industry. Cramer Rosenthal McGlynn, LLC is a signatory of the PRI (Principles for Responsible Investment). The PRI, a UN-supported network of investors, works to promote sustainable investment through the incorporation of environmental, social and governance issues into investment analysis and decision making processes. Sustainable and Impact Investing and/or Environmental, Social and Governance (ESG) managers may take into consideration factors beyond traditional financial information to select securities, which could result in relative investment performance deviating from other strategies or broad market benchmarks, depending on whether such sectors or investments are in or out of favor in the market. Further, ESG strategies may rely on certain values based criteria to eliminate exposures found in similar strategies or broad market benchmarks, which could also result in relative investment performance deviating.
